Expert Talk on “Career Opportunities in Oil & Gas Industries in Structural Analysis and Design Field” was organized on Wednesday, 06th March 2024 to increase the awareness regarding career opportunities in oil & gas industries for SE, TE and BE Civil Engineering students of Jawahar Education Society’s, Institute of Technology, Management & Research, Nashik.,

- **Outcome of the Event: -**

Mr. Deepak Shelar explained that one of the earliest subfields of engineering, civil engineering focuses on the long-term planning, construction, and management of the essential public works that support modern life. Oil companies need civil engineers to construct oil fields, pipelines, bases, and shelters for a wide variety of machinery, storage facilities, and more. Civil engineers are responsible for the creation, enhancement, and defense of the environment in which we live. They are responsible for the planning, designing, and supervising the construction and maintenance of various building structures and infrastructures, such as highways, trains, airports, bridges, harbors, dams, irrigation projects, power plants, and water and sewerage systems. They are also responsible

for designing and constructing massive constructions and towering buildings that can resist any kind of climate. Within the field of Civil Engineering lies the subfield of Structural Engineering. In the oil and gas sector they observe building sites, write reports and assessments, review the work of other engineers, do calculations, and create drawings and specifications, structural engineers also study the work of other engineers.

In addition, one will work with a team of experienced structural engineers and contribute to the planning of major global initiatives. Oil storage and processing facilities, as well as workshops and control rooms, are familiar places for civil engineers to be engaged in construction. The increasing demand for their expertise usually makes this the case.

Designation: - Principal

Other facilities required: Server Placements: The servers and network equipment to be placed in secured enclosure prevent unauthorized access.

Proxy/ Firewall: A firewall must be placed between the internet and the JAWAHAR EDUCATION SOCIETY'S INSTITUTE OF TECHNOLOGY, MANAGEMENT & RESEARCH, NASHIK LAN to allow only legitimate traffic into the JAWAHAR EDUCATION SOCIETY'S INSTITUTE OF TECHNOLOGY, MANAGEMENT & RESEARCH, NASHIK. An appliance based firewall is recommended but JAWAHAR EDUCATION SOCIETY'S INSTITUTE OF TECHNOLOGY, MANAGEMENT & RESEARCH, NASHIK may also opt for software based firewalls, if the number of computers is less.

In case of a large number of users accessing the internet, a proxy server should be used to increase internet performance by caching and also putting in controls required to access the internet.

Printer: Institutions should install at least one printer per batch of 30 students. A network laser printer is most suitable for large networks.

Projector + Screen: A portable LCD projector may be required by the students to discuss and conduct presentations. It should preferably be placed in a discussion room.

Video Conference facility: College/Institute shall provide access to VC facility whenever required to students for planned VC sessions.

Maintenance & Support: An annual maintenance and upgrade contract should be signed with the software & hardware vendor to cater for maintenance requirements and upgrades.
